CORRECTION TO THE LIST OF CHEMICALS AS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER OR REPRODUCTIVE TOXICITY

The Office of Environmental Health Hazard Assessment (OEHHA) is making a correction to the list of chemicals as known to the State of California to cause cancer or reproductive toxicity which was published on **June 6, 2003** in the California Regulatory Notice Register (Register 03, No. 23-Z). The chemical, e*rionite,* was listed on October 1, 1988 as a chemical known to the State to cause cancer with a Chemical Abstract Service (CAS) number of 12510-42-8. It was recently brought to OEHHA's attention that there is an additional CAS number, 66733-21-9, assigned to the chemical *erionite*. Accordingly for clarification, the chemical *erionite* is listed with two CAS numbers as a chemical known to the State to cause cancer.

Following is the correct listing for the chemical:

Cancer

Chemical	*Previously Listed CAS No.*	*Correct CAS No.*	*Date of Listing*
Erionite	12510-42-8	12510-42-8/ 66733-21-9	October 1, 1988

A complete, corrected chemical list is published elsewhere in this issue of the *California Regulatory Notice Register*.
