Thanks Laura!

I'd also like to submit a comment about making the interactive map easier to use for grant applicants. Since the results are used to determine where grant funding can be used, having an outline or simplified layer of just the DACs would be very helpful. At a minimum, it would be useful to have the measure tool widget added to the ArcGIS Web Map so that users can measure the half mile distance from DACs grant requirement.

Thank you!

Corey Bassett
