Subject: NOIL Aloe vera plant
Date: Thursday, June 04, 2015 1:29:28 PM

Excuse me, you can't consider scientific data in arguing over this proposition? What is it based on? Ok, how about this one - my great grandmother grew and used the aloe vera plant on her entire family for generations and I have followed suit. NO CANCER. I even cut open the leaves and put them on my face for a soothing face mask. We used the leaf for burns and skin irritations. I was out in the sun constantly. My great grandmother finally died of old age no cancer involved. No skin cancer in generations of family treated with the plant. You don't want scientific here is anecdotal.
