To whom it may concern,

I would like to voice my concern about Aspartame, and other chemicals in our food which are causing an array of medical issues for society at large.

This needs to be labeled as a carcinogen, and it's use limited. We have enough things to worry about in our lives, trying to navigate the land mines in our food supply should no be one.

This is some great reading from Medical Veritas, a specialized publication:

Aspartame the Deadly Poison
