Subject: OEHHA-Prop 65 list of cancer-causing agents

I am a senior in an area recently fluoridated, and am concerned about the health effects on seniors of, artificial fluoride. If it causes bone cancer in young boys (as proved by Bassin) what might it be doing to MY elderly bones?

I urge you to add 'Fluoride and its Salts "to the list of chemicals of concern; then you will be truly living up to the name of your umbrella group
-" Environment Protection Agency".

Thank you,

Jeanette Bajorek
