Subject: Please finalize the plan to label glyphosate
Date: Wednesday, October 14, 2015 4:23:38 PM

Dear California EPA,

Mounting evidence shows that exposure to glyphosate – the key ingredient in RoundUp – poses grave health risks for people. We have a right to know whether RoundUp contains a dangerous toxic chemical that could harm our health. I urge you to label glyphosate as a chemical “known to cause cancer.”
