In previous years, I have supplied you with ample evidence that aspartame causes cancer, specifically I sent you the complaint I sent to the FDA. After many years, they finally responded and rejected my complaint saying they didn't think much of the Soffritti studies and that was the extent of the detail they provided for rejecting the complaint.

Well, we all know about the FDA.. they will warn parents about 2 trillionths of a mg of Belladonna in homeopathic teething tablets, but not about 50 millions times more of mercury in vaccines.

In the mid 70's, I was a student of Arthur Hull Hayes, Jr. - in fact he interviewed me for medical school at the St. Francis Hotel in San Francisco. I followed his career very carefully when I realized he seemed to be doing research related to using pharma drugs and chemicals as weapons. Call it the "Dark Side" of pharma. He was hand selected by Rumsfeld to get aspartame approved as the new FDA Commissioner. I am sure you are familiar with the story and there is no point in repeating it.

I only ask you again to warn the public about this chemical that has compromised so many lives. It should never have been approved, it causes cancer and many other problems.
