Please register my strong objection to the use of Aspartame and related products in our food supply. The human sense of taste is quite sensitive and I among many others can taste the nerve poison in the product. Placing an aspartame-laden product in my mouth almost brings on a seizure-like response.

Beyond this, the research is overwhelming with regard to Aspartame toxicity. Please do all you can to stop this for the sake of our community,

Terry Fitzsimmons
