To Whom It May Concern:

Tremco Incorporated is an organization that is committed to quality, our employees, and our environment. We are responsive to both internal and external customers, and we pledge to treat everyone with good stewardship and respect. Tremco is a one-stop source of successful products and services to architects, distributors, building owners and contractors worldwide.

In regards to Proposition 65 and the proposed amendments to Article 6, Clear and Reasonable Warnings (Short Form Warning), Tremco wanted to reach out and provide feedback and our concerns on how these proposed amendments would impact our business going forward.

The proposed amendments to Proposition 65 have raised the following concerns.

- We recently had to change our labels on our cartridges, foils, and labels recently to the new language that came with the amendments a few years back. To change this again would cause a large financial strain on the business.
- The addition of the ingredients and the extra text in the statement would cause more space issues on the labels. In the past, we have utilized the short-form version because we were already pressed for space.
- Our labels for our products are industrial, not consumer (we understand that California considers them equivalent under the regulations), so the Proposition 65 related ingredients are already listed on the product labels. With the burden this will cause, an alternative to keep the current language for industrial products would be very helpful to Tremco.

I hope our concerns are well received and if there are any other questions or comments for us, please feel free to reach to me at the email below.

Sincerely,
