Re: Request to Extend Comment Period on No Significant Risk Level (NSRL) for Ethylene Oxide

To Whom It May Concern,

The Ethylene Oxide (EO) Panel of the American Chemistry Council (ACC), hereby requests an extension to the comment period. We request an extension until July 7, 2023 to submit comments. The technical issues associated with this proposal are quite complex, and additional time is needed to thoroughly review and analyze the issues. We appreciate your consideration. Thank you for your attention.

Sincerely,

William Gulledge
