**Subject:** "GLYPHOSATE NSRL"  
**Date:** Thursday, May 25, 2017 8:22:47 AM

---

To whom it may concern:

Having to live with Hashamoto's thyroiditis is a challenge that no one should be forced into by chemicals as glyphosate does to me and very large numbers of citizens of California and the world. Please know the safe level of glyphosate exposure is **ZERO**. Glyphosate, used all over California makes me sick. Independent research that has been peer reviewed make it very obvious that Monsanto's information is seriously tainted.

The only "safe level" of glyphosate that I can tolerate **ZERO**. Please do what is right for **ALL CALIFORNIA CITIZENS** by reflecting in California law that the only safe level of glyphosate exposure is **ZERO**. Do not be influenced by any private company that has not provided the whole truth about their product.

Sincerely,  
Bonnie Sellstrom  
Wilton, CA 95693
