Subject: Re: **Comments and Request re. Prop 65 - Glyphosate Regulation
Date: Friday, June 02, 2017 3:56:56 PM

Dear Ms. Barajas,

I request that the Prop 65 NSRL (No Significant Risk Level) for glyphosate must be a validly arrived at NSRL, per CA regulations, SUBSTANTIALLY LOWER than the proposed 1100 micrograms per day, in order for this Safe Harbor to actually be SAFE TO CALIFORNIANS. Until a comprehensive independent study is done, showing REAL LIFE EXPOSURE LEVELS, regulatory authorities should use a NSRL of WELL BELOW 0.0001 micrograms/day, (Thongprakaisang et al., 2013), the level where breast cancer has been detected, in keeping with The Precautionary Principle. Thank you for your consideration...especially for our children!

Sincerely,

Caroline Mallatt
