Subject: Glyphosate levels
Date: Wednesday, June 07, 2017 10:07:14 PM

To Whom It May Concern:

Glyphosate herbicide has been found in tap water, our children's urine, mother's breastmilk, and childhood vaccines.

Glyphosate has been shown by Monika Kruger of Germany to bioaccumulate in bone marrow, muscle tissues, etc.

Glyphosate has been shown to be a neurotoxin, chelator, antibiotic, and carcinogen which also causes liver disease.

One way glyphosate functions is by breaking down the blood-brain barrier and allowing other toxins (such as those found in vaccines and herbicides) into the brain.

I demand a ZERO safe level of glyphosate and I hope that you will do the right thing by banning the usage of this very toxic chemical immediately.

Thank you.
