William Fleming
Director Environmental Management
Interface, Inc.
2859 Paces Ferry Road, Suite 2000
Atlanta, Georgia 30339

Dear Mr. Fleming:

In response to Interface, Inc.'s request and pursuant to our authority under Title 27 of the California Code of Regulations, section 25204(h)(1), the Office of Environmental Health Hazard Assessment (OEHHA) is issuing the following safe use determinations for diisononyl phthalate (DINP) in Interface GlasBac® and GlasBac®RE modular carpet tiles, where DINP is present only in the structural backing layer of the tiles and the concentration of DINP in the backing layer is no more than 9% by weight in GlasBac®RE modular carpet tiles and 16.06% by weight in GlasBac® modular carpet tiles (equivalent to a DINP concentration in the whole tile of 5.04% by weight in GlasBac®RE tiles and 9% by weight in GlasBac® tiles):

1. OEHHA is issuing a safe use determination for DINP exposures to professional carpet installers from Interface GlasBac® and GlasBac®RE modular carpet tiles that do not exceed the DINP content levels specified above.
2. OEHHA is issuing a safe use determination for DINP exposures to residents of homes and other facilities from Interface GlasBac® and GlasBac®RE modular carpet tiles that do not exceed the DINP content levels specified above.

Please find enclosed copies of our document supporting these determinations and the notice, as it will appear on the OEHHA website at www.oehha.ca.gov, and in the *California Regulatory Notice Register*, dated December 15, 2017. If you would like to discuss any issue concerning the safe use determinations, please contact me at
