Subject: Aloe Vera & Goldenseal
Date: Monday, May 18, 2015 9:05:38 AM

The American Herbal Products Association (AHPA) does not agree with the classifications of *Aloe vera* and goldenseal root powder as carcinogenic and neither do I. Almost anything will cause cancer if you ingest it in extremely large doses over a lifetime. Classifying these 2 ingredients as carcinogenic would be irresponsible without conducting further studies using more realistic dosages. Please reconsider.

cheers!
