RE: Petition for Reconsideration of the Proposition 65 Listing of Glyphosate Pursuant to the Labor Code Mechanism

Dear Dr. Miller:

Thank you for your letter of June 20, 2017, requesting that the Office of Environmental Health Hazard Assessment (OEHHA) reconsider the listing of the chemical glyphosate as known to the state to cause cancer. Proposition 65<sup>1</sup> requires the listing of certain chemicals and substances identified by reference to the California Labor Code.<sup>2</sup> On March 28, 2017, OEHHA announced that glyphosate would be listed as known to cause cancer for purposes of Proposition 65, based on its identification by the International Agency for Research on Cancer (IARC) as causing cancer.<sup>3</sup> IARC indicated that the identification was based on "sufficient evidence" in animal studies and "limited evidence" in human (epidemiological) studies.<sup>4</sup> Under the statute, case law and regulations, chemicals identified by IARC as carcinogens with sufficient evidence of carcinogenicity in humans or animals must be listed under Proposition 65. Specifically, Health and Safety Code section 25249.8(a) provides as follows:

*"(a) On or before March 1, 1987, the Governor shall cause to be published a list of those chemicals known to the state to cause cancer or reproductive toxicity within the meaning of this chapter, and he shall cause such list to be revised and republished in light of additional knowledge at least once per year thereafter. Such list shall include at a minimum those substances identified by reference in Labor*

<sup>1</sup> The Safe Drinking Water and Toxic Enforcement Act of 1986, codified at Health and Safety Code section 25249.5 et seq., commonly referred to as Proposition 65.

<sup>2</sup> See Health and Safety Code section 25249.8(a) and Title 27, Cal. Code of Regs., section 25904.

<sup>3</sup> See <https://oehha.ca.gov/proposition-65/cmr/glyphosate-be-listed-under-proposition-65-known-state-cause-cancer>. The chemical has not been added to the list due to Monsanto's request for a stay in the Court of Appeal, which was summarily denied on June 16, 2017, and the Supreme Court, which summarily denied it on June 22, 2017.

[www.oehha.ca.gov](http://www.oehha.ca.gov)

*Code Section 6382(b)(1) and those substances identified additionally by reference in Labor Code Section 6382(d).*" (Emphasis added.)

Labor Code section 6382(b)(1) identifies the following chemicals and substances:

"(1) Substances listed as human or animal carcinogens by the International Agency for Research on Cancer (IARC)."

OEHHA's obligations under the Labor Code listing mechanism of Health and Safety Code section 25249.8, subdivision (a), which incorporates section 6382, subdivision (b)(1) of the Labor Code, was litigated in several cases, all of which found that OEHHA is required to list carcinogens identified by reference to the Labor Code.<sup>5</sup> OEHHA has also adopted regulations setting out the criteria for listing chemicals via this mechanism and the required showing for a request for delisting or reconsideration. As stated in the regulations:<sup>6</sup>

"(a) Pursuant to Section 25249.8(a) of the Act, a chemical or substance shall be included on the list of chemicals known to the state to cause cancer if it is a chemical or substance identified by reference in Labor Code Section 6382(b)(1) as causing cancer.

(b) A chemical or substance shall be included on the list if it is classified by the International Agency for Research on Cancer (IARC) in its IARC Monographs series on the Evaluation of Carcinogenic Risks to Humans (most recent edition), or in its list of Agents Classified by the IARC Monographs, as:

(1) Carcinogenic to humans (Group 1), or

(2) Probably carcinogenic to humans (Group 2A) with sufficient evidence of carcinogenicity in experimental animals, or

(3) Possibly carcinogenic to humans (Group 2B) with sufficient evidence of carcinogenicity in experimental animals. A chemical or substance for which there is less than sufficient evidence of carcinogenicity in experimental animals and classified by IARC in Group 2B shall not be included on the list...

... (e) Any person may petition the lead agency to consider removing a chemical or substance from the list pursuant to this section. The petition shall identify the chemical or substance in question *and the reasons why the provisions of subsections (a) and (b) are not met.*" (Emphasis added)

<sup>5</sup> *California Chamber of Commerce v. Brown, et al.* (2011) 196 Cal. App. 4th, 233; *Styrene Information and Research Center v. Office of Environmental Health Hazard Assessment* (2012) 210 Cal. App. 4th 1082 ; *Sierra Club v Brown* (2013) Alameda County Superior Court case #RG0735881.

<sup>6</sup> Title 27, Cal. Code of Regs, section 25904.

Pursuant to Section 25904, subdivision (e) of the regulations, the only legal basis for a request for reconsideration of a chemical's placement on the Proposition 65 list would be that the provisions of subsections (a) and/or (b) are not met. Monsanto has not made such a showing, having provided no evidence that IARC has changed its classification of glyphosate as a carcinogen, or its finding that animal studies provided sufficient evidence of carcinogenicity. Instead, Monsanto complains that IARC, pursuant to its own rules, only considered published, peer-reviewed studies when making the glyphosate determination in 2015, and contends that the IARC finding was erroneous because it did not consider certain unpublished data. It appears that Monsanto has already brought the issue to IARC's attention and they have provided a reasonable response stating that they can re-evaluate a substance when a significant body of new scientific data is published in the openly available scientific literature.<sup>7</sup>

In the event IARC were to change its classification of glyphosate, resulting in subdivisions (a) and/or (b) of Title 27, California Code of Regulations section 25904 no longer being met, Monsanto would at that time be able to petition OEHHA to reconsider the listing. If OEHHA were to determine at that time that glyphosate no longer meets the listing criteria in the regulation, OEHHA would then determine whether the chemical met the criteria for listing via another listing mechanism, and if not, refer the chemical to the Carcinogen Identification Committee for consideration for potential delisting as provided in the regulation.<sup>8</sup> Unless and until IARC changes its classification of glyphosate, this request for OEHHA to reconsider its listing decision is premature. Monsanto's request is denied. However, Monsanto may re-submit the request in the event IARC changes its determinations regarding this chemical.

If you have questions regarding this letter, please feel free to contact me at (916) 322-6325.

Best Regards,

Allan Hirsch  
Chief Deputy Director
