Air Pollution and Lifecourse Neurological Impacts

Please join OEHHA and the Children's Environmental Health Center for our next children's environmental health symposium exploring "Air Pollution and Lifecourse Neurological Impacts."

The symposium will:

- Examine new findings on early-life exposures and vulnerability to the neurological impacts of air pollution
- Examine new findings on air pollution exposure across the lifespan and neurocognitive decline
- Inform state agency scientists working in environmental and public health of the latest scientific findings on children's health and air pollution
- Update regulatory scientists and the public about future long-term impacts on children and the elderly related to air pollution
- Inform state agencies as they carry out their duties, including the protection of children's health

October 2, 2018
9:00 am – 4:45 pm

CalEPA Building
1001 I St.
Sacramento, CA
Sierra Hearing Room
