

ART AND CRAFT MATERIALS THAT CANNOT BE PURCHASED FOR USE IN KINDERGARTEN THROUGH 6TH GRADE

Office of Environmental Health Hazard Assessment
California Environmental Protection Agency
July 2025

California Education Code Section 32064 prohibits schools from purchasing art or craft materials containing a toxic substance for use by students in kindergarten and grades 1 to 6 (K-6). The law also requires the Office of Environmental Health Hazard Assessment (OEHHA) to develop a list of products that schools cannot purchase for use by students in grades K-6. The current list is provided in this document.

This list is intended to assist schools, school districts, and governing authorities of private schools in complying with the purchasing requirements. In addition to the listed items, products accompanied by a Proposition 65 warning should not be purchased for use in grades K-6.

Purchasers must ensure that all art and craft materials to be used by students bear a statement of conformity to ASTM D-4236 (Standard Practice for Labeling Art Materials for Chronic Health Hazards), as required by federal law¹. Items to be used by students in grades K-6 must not bear acute or chronic health hazard labels. Although not required by law, avoiding art materials that bear acute or chronic health hazard labels when purchasing for grades 7-12 is also a good precautionary measure. For further information, please see *Art and Craft Materials in Schools: Guidelines for Purchasing and Safe Use*, available online (<https://oehha.ca.gov/media/downloads/risk-assessment/document/guidelines2019.pdf>).

OEHHA compiled the list below to include the following:

- 1** - Products identified on the Art and Creative Materials Institute, Inc.'s (ACMI) Certified Products List as either bearing the "Cautionary Labeling" ("CL") seal or not bearing the "Approved Product" ("AP") seal. Listing is based on the ACMI Certified Products List downloaded by OEHHA on June 2, 2025. The "CL" seal means that based on a toxicological evaluation, these products are certified to contain materials in sufficient quantities to be toxic or injurious to humans, including children. An asterisk (*) in the list below indicates that there are specific items in the product line that bear the "CL" seal.
- 2** - Products recalled by the United States Consumer Product Safety Commission (CPSC). OEHHA accessed the CPSC database on June 13, 2025, and searched the list of recalled items using keywords on the art hazards list (clay, markers, art, craft, cleaners, etc.).

¹ The Federal Hazardous Substances Act (FHSA), 15 U.S.C. § 1261 et seq., and the Labeling of Hazardous Art Materials Act (LHAMA), 15 U.S.C. §1277, and 16 C.F.R. § 1500.14(b)(8).

- 3 - Products brought to OEHHA's attention as bearing health hazard labels, including warnings for Proposition 65, or containing toxic chemicals, subject to verification by OEHHA.**

Products are listed under eight descriptive categories, as follows:

Adhesives: Substances applied to a surface to bind materials together, such as glue, rubber cement, plastic cement, or spray adhesives.

Brush care products: Liquids and oils that dissolve, dilute, or disperse paint or varnish for cleaning and preserving brushes, such as mineral spirits and turpentine.

Ceramics and Sculpting Materials: Materials shaped into three-dimensional objects, such as clay or plaster, and materials fused to ceramic objects, such as glazes, slips, or ceramic wash.

Cleaners and Solvents: Liquids that dissolve, dilute, or disperse other substances for artistic effect or cleaning, such as mineral spirits, dry-erase cleaner, turpentine, paint thinner, or brush cleaners.

Drawing, coloring, etching, and craft materials: Materials (except paints) used to render designs or colors on a surface, such as pastels, ink, encaustic wax, colored pencils, or markers; materials used to prepare a surface for ink transfer, such as etching acid or soda ash; other materials used for art and craft projects, such as glitter or embossing powder.

Paints: Surface coatings applied as a thin layer to give color to an object. Paint media include acrylic, alkyd, oil, tempera, gouache, pigments, and watercolor.

Photographic Chemicals: Chemical products used to set photosensitive emulsions on surfaces or used to develop images from exposed photosensitive materials. Such chemicals include developer, stop bath, fixer, toner, photo sensitizer, and cyanotype chemicals.

Preparation, Process, and Finishing Materials: Materials used for surface preparation; materials used for control in the process of creating artwork, such as masking fluid or drying medium; materials used to protect or give a particular visual quality to the surface of a piece, such as varnish, fixatives, or finishing spray.

Some products that contain a toxic substance or that carry a Proposition 65 warning may not be listed here. To ensure safety, OEHHA recommends that purchasers check products for health hazard labels before purchasing. For questions regarding this list, or to bring information regarding additional products for possible inclusion in future updates, please contact art.hazards@oehha.ca.gov or:
