

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY  
OFFICE OF ENVIRONMENTAL HEALTH HAZARD ASSESSMENT

SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT OF 1986  
(Proposition 65)

NOTICE TO INTERESTED PARTIES  
**July 11, 2003**

CORRECTION TO THE LIST OF CHEMICALS  
AS KNOWN TO THE STATE OF CALIFORNIA  
TO CAUSE CANCER OR REPRODUCTIVE TOXICITY

The Office of Environmental Health Hazard Assessment (OEHHA) is making a correction to the list of chemicals as known to the State of California to cause cancer or reproductive toxicity which was published on **June 6, 2003** in the California Regulatory Notice Register (Register 03, No. 23-Z). Although not specifically named, *nickel carbonate*, was included in the October 1, 1989 group listing of “nickel and certain nickel compounds” listed as chemicals known to the State to cause cancer. *Nickel carbonate* was recently included in a June 6, 2003 public notice specifying Chemical Abstract Service (CAS) numbers for the nickel compounds covered under the listing of “nickel and certain nickel compounds.” Its CAS number was listed as 3333-39-3. It was recently brought to OEHHA’s attention that the CAS number for *nickel carbonate* was listed incorrectly. The correct CAS number for nickel carbonate should be 3333-67-3.

Following is the correct listing for the chemical:

*Cancer*

<i>Chemical</i>	<i>Previously Listed CAS No.</i>	<i>Correct CAS No.</i>	<i>Date of Listing</i>
Nickel carbonate	3333-39-3	3333-67-3	October 1, 1989

A complete, corrected chemical list is published elsewhere in this issue of the *California Regulatory Notice Register*.
